

Call for Papers

Special Issue of RAIRO-Operations Research on Recent developments of operations research and data sciences

We invite submissions of novel research articles for a forthcoming issue of *RAIRO-Operations Research* on "**Recent developments of operations research and data sciences**".

This special issue will be dedicated to the second edition of the International Conference on Mathematics & Data Science (ICMDS) to be held in Khouribga, Morocco, October, 27-29, 2021. However it is also open to papers which have not been presented at the conference.

High quality research papers are solicited to address theoretical as well as practical issues of Operations research and data sciences. Topics of interest include, but are not limited to:

- Operations research
- Data sciences algorithms
- Machine learning optimization
- Non-standard optimization
- Inverse Problems
- Graph and network algorithms
- Imaging optimization techniques
- Linear and integer programming
- PDE-constrained optimization
- Source separation technique

The deadline for submission of full papers is December 27, 2021.

For their submissions, the authors can send their contributions to one of the Guest Editors. (OR SUBMIT DIRECTLY THEIR CONTRIBUTION VIA):

<https://www.editorialmanager.com/ro/>

Electronic submissions in the form of pdf files are encouraged. All submissions will be refereed according to the high standards of the journal.

Information about RAIRO-Operations Research including author instructions is available at <https://www.rairo-ro.org/author-information/instructions-for-authors>

Guest Editors:

A. Ridha Mahjoub, mahjoub@lamsade.dauphine.fr, 01.44.05.48.96, Laboratoire LAMSADE, Université Paris Dauphine Place du Maréchal de Lattre de Tassigny 75775, Paris CEDEX 16.
