Special Issue : Graphs, Combinatorics, Algorithms and Optimization
RAIRO – Operations Research
Call for Papers

The Theoretical Computer Science Meeting (ETC - Encontro de Teoria da Computação, in portuguese) is an annual event during the Conference of the Brazilian Computing Society (SBC - Sociedade Brasileira de Computação, in portuguese) that aims to bring together researchers from the theoretical areas of computer science, especially graphs, combinatorics, algorithms and optimization. ETC'2022 (csbc.sbc.org.br/2022/etc/) celebrated the 80th birthday of Prof. Jayme Szwarcfiter.

As a follow up of the symposium, we are pleased to announce that there will be a special issue of *RAIRO Operations Research* as part of the celebration of Prof. Jayme's 80th birthday. Authors are invited to contribute to this special volume with full papers. The papers should relate to the central themes of ETC'2022, but not restricted to papers submitted to the symposium. The submissions will undergo a new round of reviews in accordance with *RAIRO Operations Research* policies.

 Submission deadline. December 15, 2022
